## ◆ Disposable Endo Linear Cutter Stapler and Reloading Unit

### Product features and advantages:

◎ **Joint head design**

The stapler can be rotated 45 degrees from side to side for better angle operation;

◎ **Reloads connection and operating shaft**

Well matching 30, 45 and 60 reloads, the shaft can rotate 360 degrees;

◎ **Excellent stitching**

Six rows of nails to secure the stitches, consistent staples at distant end and proximal end;

◎ **Complete specifications**

A variety of reloads are available to meet the clinical needs of various operations;

◎ **Convenient operation**

The reloads has a 45-degree bidirectional swing head and a 360-degree synchronous rotation;

◎ **Cutting edge sharpening**

The cutting blade is replaced with the reloads at the same time to ensure the sharp blade;

◎ **Reloads wide opening and thin anvil**

Wide opening reloads to get tissue conveniently, thin anvil makes entering smooth;

◎ **Cutter head indicatrix**

To indicate the position of cutter head under the endoscopy for better safety;

◎ **Safety inner lock device**

To prevent reloads from being triggered unexpectedly for better safety;

◎ **Highly cost effective**

Can be repeatedly use 25 times on the same patient case .

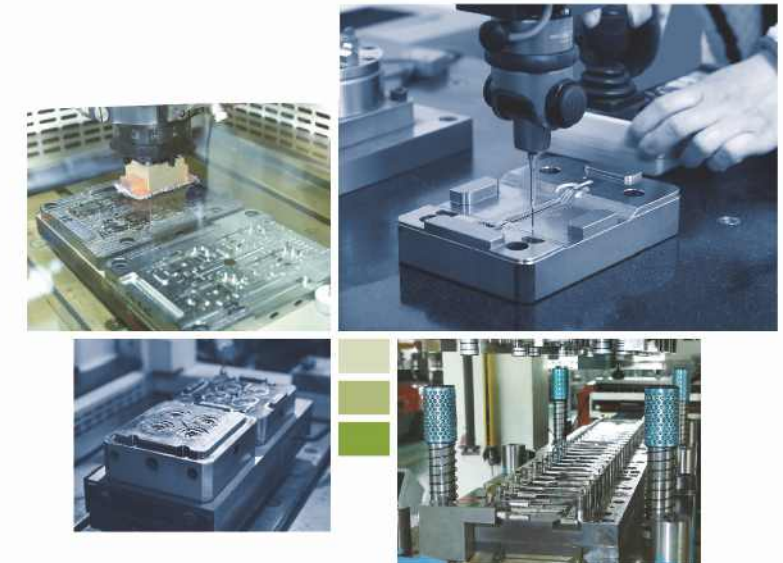

◎ 20 years of professional experience of independent R&D and production in laparoscopic surgical instruments.

◎ Enterprise purpose: credit first, technological innovation, high quality and efficiency, customer priority

◎ Frontrunner of laparoscopic surgery industry

◎ Products quality owns the industry reputation

◎ Abide by the principle: quality is the life of an enterprise

Disposable Endo Linear Cutter Stapler (Covidien Style)		
Product model	Specification	Shaft Length (mm)
WPYQB-60	60	60
WPYQB-160	160	160
WPYQB-260	260	260

## ◆ Disposable Endo Linear Cutter Stapler and Reloading Unit

### Product features and advantages:

- ◎ Gecko claw design, less tissue overflow;
- ◎ New negative Angle design, greater gripping force;
- ◎ Water Drop staple groove design, better clinical B shape;
- ◎ Double pressure, the jaws are closed in advance, and the tissue is pressed in advance to prepare for shaping staples;
- ◎ The three-point gap of the cutter makes the equal force near and far, and the staples are formed precisely at the same height;
- ◎ After the suture and cutting is completed, the cutter automatically resets, which makes the operation easier and the instrument can be operated with one hand during the operation;
- ◎ Forging and machined arc nail anvil, the pressure of the jaw is increased, the staple forming consistency is good;
- ◎ 6 kinds of stapler body, 10 kinds of cartridges, more clinical options.

## ◆ Disposable Powered Endo Linear Cutter Stapler and Reloading Unit

### Product features and advantages:

- ⦿ Uniform cutting: the operation is safer and more reliable; the staple shape effect is better;
- ⦿ Electric drive: cut and sew more smoothly, avoid artificial jitter pulling tissue;
- ⦿ Electric closing clamp: smoother when closing, accurately perceive of closing force;
- ⦿ Intelligent reminder system: intelligent judge whether the tissue thickness is within the working range of the selected cutting reloads ;
- ⦿ Smart card swiping system: The stapler can be equipped with 30/45/60mm cutting length reloads;
- ⦿ Convenient operation: One-click forward/backward function.

## ◆ Disposable Powered Endo Linear Cutter Stapler and Reloading Unit

### Product features and advantages:

- ⦿ Uniform cutting: the operation is safer and more reliable; the staple shape effect is better;
- ⦿ Electric drive: cut and sew more smoothly, avoid artificial jitter pulling tissue;
- ⦿ Water Drop staple groove design, better clinical B shape;
- ⦿ Gecko claw, negative angle design: greater clamping force, to ensure smaller tissue overflow;
- ⦿ Up to 12 stapler sizes and 10 cartridges, including 6 active bend system devices, give more clinical options.
